

AQUA-LINK

PRODUCT DATA SHEET

Waterborne Polyurethane Cross Linker

Introduction

Aqua-link is a polyurethane cross linker that is stirred into Aquapol waterborne polyurethane to enhance wear properties and resistance to chemicals.

Key Benefits

- ❖ Simple stir in addition to Aquapol Gloss, Aquapol Satin, Aquapol Lo-Sheen and Aquapol Matt
- ❖ Lifts performance to the level of solvent-based alternatives
- ❖ Long pot-life with rapid curing
- ❖ No lingering smells or flammable solvents

Direction for Use

1. Simply determine the amount of Aquapol required for the job. For each litre of Aquapol, you will need 100ml of Aqua-link (10:1 ratio).
Example:
 - 1 litre Aquapol : 100ml Aqua-link
 - 5 litres Aquapol : 500ml Aqua-link
 - 10 litres Aquapol : 1 litre Aqua-link
2. Measure out Aquapol into bucket and add Aqua-link.
3. Stir for 60 seconds making sure mixture is smooth and consistent.
4. Pour into tray and start coating.
