

PATCH-IT!

PRODUCT DATA SHEET

Rapid Drying – Cement Based – Ramping and Patching Compound

Introduction

Patch-It! Is a cement based patching and ramping compound designed to harden quickly and provide a sound surface prior to the installation of floor coverings such as carpet, vinyl and ceramic tiles.

Key Benefits

- ❖ Rapid hardening and drying
- ❖ Good working time
- ❖ Excellent cured surface properties

Substrate Preparation

Sub-floor should be free of moisture, oils, waxes, efflorescence, old finishes, etc and be below 70% relative humidity as per the requirement of AS1884 (current relevant version). Please consult with your Handley Industries Ltd representative if these conditions are not met.

Coverage

20kgs will cover 12 square metres at 1mm thickness.

Mixing

Add powder to water. Stir briskly until lump free.
Mix 20kg bag to 5L fresh tap water (approx. 3:1 by vol).

Pot Life

About 15 minutes at 20°C. Mix only what can be used in this time to avoid waste.

Application

Apply using a steel trowel.

Thickness

Up to 35mm in one application (unfilled).

Flooring Installation

May be installed as soon as Patch-It! is hard enough to walk on.
